This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1 (original). A method of identifying an image file using a voice recognition system in a camera-equipped mobile communication device, comprising:

capturing an image in an image file with a digital camera in the mobile communication device;

adding a voice tag to the image file;

storing the image file and voice tag in the mobile communication device;

activating retrieval of the image by speaking the associated voice tag;

processing the voice tag input by the voice recognition mechanism of the mobile communication device;

searching stored images for the input voice tag; and

displaying the image associated with the input voice tag.

Claim 2 (original). The method of claim 1 wherein a single voice tag is associated with a group of related images.

Claim 3 (original). The method of claim 1 wherein the image is a video image.

Claim 4 (currently amended). A method of identifying an image
file using a voice recognition system in a camera-equipped mobile
communication device, comprising:

capturing an image in a image file with a digital camera in the
mobile communication device, wherein the image is ~~take~~ <u>taken</u> from the
group of images consisting of single images, groups of images and video;

adding a voice tag to the image file;

storing the image file and voice tag in the mobile communication
device;

activating retrieval of the image by speaking the associated
voice tag;

processing the voice tag input by the voice recognition
mechanism of the mobile communication device;

searching stored images for the input voice tag; and

displaying the image associated with the input voice tag.
